John L – what are the projects related to GKM. I am trying to create the login page for GKM. What else do we need to do?

Thanks,

Dawit

Hi John,

John W would like us to clean up the “Choose Scribe Project” list on the front page of SADIE. There are 3 projects related to the Gold King ER. As I understand it, 1 is a master table and used by the SADIE widget in the viewer, 1 populates that master table with analytical results, leaving 1 project to be bogus and unused. Are we able to remove that unused project from our subscription list and which one is it? Also, please correct me if I am wrong.

Thanks,

-RB

Your widget would be great. Even if you add a map service the pop does not bring anything.

Hi John, We are working with SADIE to develop views and it appears as if it is not refreshing in the Region 06 SADIE widget. We have success and current view holdings available with your R08 widget but not with R06 Gold King Ops. Please advise.

Existing field in lab results

On Aug 11, 2015, at 9:05 AM, Kidane, Dawit <Kidane.Dawit@epa.gov> wrote:

I guess it is possible. Is QC Comment coming from a field in the scribe table or somewhere else? Adding column is easy if it is existing field. It is not difficult if you want it manually too.

Thanks don't get me started ☺. So can we add QC Comment to Sadie and how quick can we get that done?

Thanks John,

Too bad they went with Region 6 web viewer. The “view trend” is cool, but the “View Graph” is what takes us to SADIE and I am not sure that is as intuitive as the “View Analytical Results” you had in there before. Good Job
